REPORTS ISSUED and PUBLICATION DATES

(on inside back cover)

COMMENTS FROM THE GOVERNOR

Agriculture today is a complex and multi-faceted business enterprise. Agri-business people need concise and accurate information upon which to base their decisions. This 39th edition of the Montana Agricultural Statistics Bulletin provides that type of information in printed and electronic format.

Each day, Montana's agricultural industry faces many challenges; world competition, weather, trade concerns, federal issues, along with the day to day management concerns related to production, finances, and marketing. The information provided in this bulletin will assist Montana's agri-businesses in their decision-making processes.

My deepest appreciation goes to those individuals who persist in providing the nation and the world with high quality Montana agricultural products. With this ingrained desire to succeed, agriculture will continue to be Montana's number one industry

Sincerely,

A handwritten signature in cursive script that reads "Judy Martz".

Judy Martz
Governor

MESSAGE FROM THE DIRECTOR

Each year Montana's agricultural industry is faced with challenges that are not controlled by the producer. These challenges are varied and may include the weather, markets, production costs, disease, international relations, and others.

In this increasingly complex arena, Montana's farmers, ranchers, and agri-businesses must have quick access to concise, reliable information to assist them in making sound managerial decisions. In this 39th annual edition of *Montana Agricultural Statistics* (available in printed or electronic format), our agricultural industry will find accurate and reliable information necessary to make those decisions.

We encourage Montana's agricultural community to use this information in their decision-making process as they continue to provide a diverse spectrum of products for Montana, the United States, and the world.

Sincerely,

A handwritten signature in dark ink, appearing to read 'Ralph Peck'.

Ralph Peck, Director

NOTES FROM THE STATE STATISTICIAN

Once again Montana Agricultural Statistics Service is proud to publish the thirty-ninth edition of *Montana Agricultural Statistics*. In spite of the drought, Montana's agricultural sector continues to exceed two billion dollars and is a vital industry for Montana's economy. Montana ranks third among states in wheat exports, only exceeded by North Dakota and Kansas. Thank you to Montana's farmers, ranchers, and agribusinesses who made this publication possible through their willingness to provide basic agricultural information.

Montana Agricultural Statistics Service works in cooperation with the Montana Department of Agriculture, the Montana Wheat and Barley Committee, the Montana Alfalfa Seed Committee, Montana State University and many other producers' organizations to provide valuable agricultural information. Thanks to everyone who made this publication possible.

A handwritten signature in dark ink, appearing to read 'Peggy Stringer'.

Peggy Stringer, State Statistician

MONTANA DEPARTMENT OF AGRICULTURE

The Department of Agriculture, through the Director, is responsible for administration of a \$13 million annual budget with 108 employees. The Director oversees the department's three divisions and six bureaus. The function of each division is summarized below.

Central Management Division performs technical, fiscal and administrative support functions for the department. Responsibilities of the division include activities for internal operations of the department.

Agricultural Sciences Division is responsible for the registration of 7,025 pesticide products; the training, certification and licensing of 1,510 commercial and government applicators, 1,677 operators, 447 pesticide dealers, and 8,200 private applicators.

The division provides evaluation of pest management problems and programs; training and licensing of government and commercial pesticide applicators and dealers; and analytical laboratory and consultative services to other agencies and the public. In addition, the division is responsible for the administration and enforcement of regulatory laws controlling the production, manufacturing, and marketing of agricultural commodities exported from or distributed within Montana. The division investigates consumer complaints; performs technical expertise and licenses for 480 nurseries, 656 feed dealers, 234 fertilizer dealers, 320 seed dealers and 105 grain merchandisers. The division also registers 2,698 pet food products, 1,200 fertilizers, and 5,030 bee yards.

The passage of the Montana Agricultural Chemical Ground Water Protection Act (1990) charges the department to protect ground water and the environment from impairment or degradation due to the use of agricultural chemicals. The Vertebrate Pest Management program provides on-site demonstrations, educational materials and technical bulletins to assist producers in reducing damage caused by field rodents, birds and other large mammals.

The Weed Management program is responsible for administering statewide efforts aimed at control and/or eradication of noxious and other undesirable weeds. The Noxious Weed Seed Free Forage Program provides a certification mechanism that allows producers to market various forage crops as being noxious weed seed free.

The Agricultural Development Division is responsible for administering programs directed at promoting and enhancing Montana agriculture. The Agriculture Finance program provides grants and lower interest rate loans for rural youth, rural youth organizations, and other qualified farmers and ranchers while the Montana State Hail Insurance Program insures any type of crop grown in Montana from losses caused by hail damage.

The Marketing Program provides assistance for market development/enhancement activities through the use of grants, seed capital loan investments, product development, and interaction between department staff and entrepreneurs. Statewide agricultural statistics and projections are developed through a Federal/State cooperative agreement and then made available in a comprehensive agricultural statistics bulletin and grain movement summary along with other production, price and income reports. Alfalfa seed research and market development efforts are administered through the Montana Alfalfa Seed Committee. The Montana State Grain Laboratory located in Great Falls operates the only official USDA-Federal Grain Inspection Service grain-grading laboratory in the state of Montana. The lab provides unbiased grain grading, analytical services, and oil seed analysis to the state's grain industry. Scientific and practical research in all phases of wheat and barley culture, production, and marketing is administered under the guidelines and policies developed by the Montana Wheat and Barley Committee.

MONTANA CROP, LIVESTOCK AND WEATHER DIGEST, 2001

January: A high pressure system kept Montana warmer and drier than normal for the majority of the month. Snow cover on winter wheat fields was a concern of producers at the end of January with protectiveness ratings of 1% excellent, 2% good, 30% fair, 55% poor, and 12% very poor. Wind damage to the winter wheat crop was reported at 5% heavy, 18% moderate, 41% light, and 36% none at month's end. Calving and lambing were off to a good start, benefitting from the mild January weather. Livestock grazing was reported at 43% open, 34% difficult, and the rest closed.

February: The weather was generally mild for the month, except for a strong cold front that moved through the state on the 5th. Snow cover provided generally adequate protection and moisture for the winter wheat crop. Because of a lack of forage due to last year's drought, virtually all livestock were receiving supplemental feed at month's end. Calving and lambing were 21% and 13% complete, respectively.

March: Montana's weather was warm and dry in March. During the month, the average precipitation received was only 0.13 inches, which made it the driest March since 1963 and the fourth driest on record. The mild conditions allowed producers to start fieldwork towards the end of the month. Nearly all of the cattle and calves and sheep and lambs were receiving supplemental feed because of poor range and pasture conditions. At month's end, calving and lambing were 52% and 44% complete, respectively, both behind last year.

April: Many areas of the state received near normal amounts of rain or snow the first weeks of April. Precipitation was very light the last part of the month, which allowed producers to make good seeding progress with small grains. Topsoil moisture was rated at very short or short for a majority of the state by month's end. Calving was 89% complete, compared to last year's estimate of 91%. Lambing was 83% complete, ahead of last year's estimate of 77%. Livestock producers were concerned about a water shortage for livestock, as some ponds and reservoirs were reported as either low or empty.

May: Some areas of the state received rain the first week in May, but hot, dry conditions prevailed the rest of the month. Topsoil moisture during May continued to be rated very short or short for the majority of the state. Sixty-three percent of the winter wheat was reported in very poor or poor condition by the end of the month. Small grains and sugar beets seeding was nearly completed by the last week. Calving was virtually finished, and lambing was 96% complete. Livestock producers remained concerned about a water shortage for livestock.

June: Rain showers fell across the state the first two weeks in June. Precipitation was generally light the last part of the month. Crop conditions improved little as a result of the mid-June rains. Eighty percent of the winter wheat crop was reported in very poor and poor condition at month's end. The first cutting of alfalfa hay was 28% complete compared with 53% the previous year. Topsoil moisture was rated at 12% very short, 38% short, 47% adequate, and 3% surplus. CRP land was opened to grazing. All livestock were moved to summer pastures by the end of June.

July: Much of the state received precipitation in July, ranging from gentle showers to heavy downpours. Some producers reported hail damage to crops. Winter wheat was 41% harvested by the end of the month, ahead of the five-year average of 23%. The first cutting of alfalfa hay was 93% complete and the second cutting was underway by month's end. Because of poor crop and range conditions, some small grain producers cut grains for livestock feed. In many parts of the state, CRP acres were grazed or producers cut hay from the land.

August: Montana had hot temperatures and precipitation the first week in August. Havre set the high at 109 degrees. The weather remained hot but turned dry the second week, which allowed producers to make good progress in harvesting small grains and hay crops. At month's end, the winter wheat harvest was virtually finished, and the spring wheat, barley and oats harvests were three-fourths complete. The second cutting of alfalfa hay was 83% complete, compared with 91% last year. Livestock producers reported shortages of range and pasture feed and livestock water in areas of the state.

September: During the first week, rainfall was received throughout the state. Temperatures were still hot, but not as hot as previous weeks. Mid-month warm and dry conditions allowed farmers to completely harvest small grain crops by the end of the month. The second cutting of alfalfa hay was 99% complete, compared to the five-year average of 97%. The 2002 winter wheat crop was 71% seeded by month's end, well ahead of the 47% average for the last five years. Forty percent of the cattle and calves and 49% of the sheep and lambs were reported moved off summer pastures.

October: Dry conditions continued the first week, allowing producers to make good progress with harvesting late season crops. Most areas of the state received a little rainfall the rest of the month. The 2002 winter wheat crop was 98% seeded at month's end. Dry beans and corn for silage were 100% harvested, and the sugar beet and potato harvest was 99% complete. Because of poor range and pasture conditions, some livestock producers grazed their cattle on crop stubble. By the end of October, 78% of the cattle and calves and 81% of the sheep and lambs were moved off summer pastures.

November: November was unseasonably warm and dry. Producers were concerned about the lack of snow, as winter wheat protectiveness of snow cover was rated 52% poor and 41% very poor. The last few days of the month brought colder temperatures and moisture to the state. Topsoil and subsoil moisture were both rated at very short or short at month's end. Hay supplies for livestock feeding were reported down. Approximately two-thirds of the state's livestock were receiving some supplemental feed by the end of the month.

December: The weather for the month was warmer and drier than normal. The lack of snow cover on winter wheat fields continued to concern producers. At month's end, wind damage to the winter wheat crop was rated at 49% heavy, 19% moderate, 25% light, and 7% none. Because of the mild winter conditions, livestock grazing remained primarily open, although drought-stricken areas had little forage.

MONTANA FACTS AND FIGURES

Montana's 2001 population, at 904,433, was up 13.2 percent from 1990. Population density, measured in people per square mile, was 6.2 in 2000—third lowest in the United States. Montana's 56.5 million acres of land in farms and ranches rank second in the nation behind Texas.

Montana Population

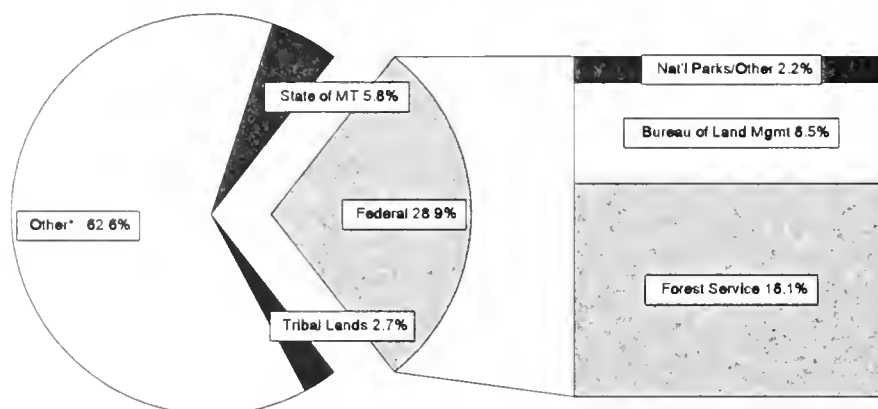

Total, 2001 Census, estimate	904,433
People per Square Mile	6.2
Rural Farm Population (1990)	45,718
People per Farm	1.9

Land and Land Utilization¹

Montana Total Land Area	145,388 Miles
Montana Total Land Area	93,048,320 Acres
All Land in Farms & Ranches	58,607,778 Acres
Proportion of Land in Farms & Ranches	63.0 Percent

1 1997 U.S. Census of Agriculture

MONTANA LAND AREA Ownership as a Percentage of Total

* Private land including roads, railroads, airports, etc.

Source: BLM "Public Land Statistics, 1997", USFS, BIA, State of Montana, Department of State Lands.

Farm Counts and Measurements, 2000

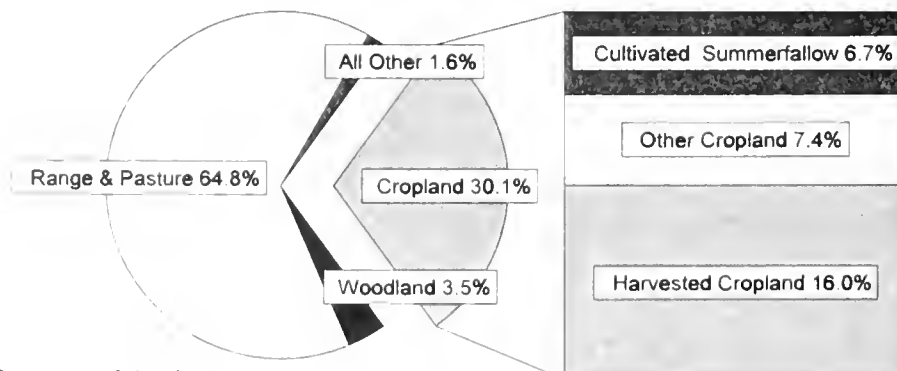

Number of Farms & Ranches ¹	27,600	Real Estate Value/Farm or Ranch	\$698,335
Average Size of Farm or Ranch	2,054 Acres	Average Value Per Acre ³	\$375
Total Farm & Ranch Assets ²	\$24.5 Bil.	Farm & ranch Debt Per Operation	\$100,938
Average Value Per Farm or Ranch	\$889,457		

1 Places with annual sale of agricultural products of \$1,000 or more.

2 Excludes farm operators' household assets and debt.

3 Per acre, land and buildings, January 1, 2001.

1 Farms are places that had or would have had annual sales of agricultural products of \$1,000 or more.

MONTANA INDUSTRY COMPARISON TO AGRICULTURE

Agriculture Remains the Number One Industry in 2001

A comparison of selected Montana industries shows agriculture continues to outpace other industry sectors by \$556 million. Crop cash receipts declined to \$657 million, a drop of \$80 million or 11 percent from 2000. Livestock cash receipts increased from 2000 to \$1,128 million, an increase of 2 percent. Government payments decreased 3 percent in 2001 to \$476 million, down from \$490 million in 2000.

Receipts for gas and oil rose \$132 million, up 21 percent from 2000. Wood and paper products decreased 10 percent or \$105 million. Receipts for mining decreased \$42.9 million from 2000 to \$647 million. Non-residential travel increased \$7 million over 2000 to \$1,746 million, up less than 1 percent from 2000.

Net farm income	280.8	314.0	498.3	271.9	303.9

1 Final sector output is the gross value of the commodities and services produced within a year. Net value-added is the sector's contribution to the National economy and is the sum of the income from production earned by all factors of production. Net farm income is the farm operator's share of income from the sector's production activities. The concept presented is consistent with that employed by the Organization for Economic Cooperation and Development.

2 A positive value of inventory change represents current-year production not sold by December 1. A negative value is an offset to production from prior years included in current-year sales.

Farm Real Estate Values, Rent per Acre and Rent to Value

1 Rent as a percentage of per acre value of rented land.
2 For 1992-1995 this is the Value per Acre of Land and Buildings
3 Survey procedures change from Agricultural Land Value Survey to June Agricultural Survey beginning in 1994. Value for both procedures are published for comparison.

1 Marketing year average prices received by farmers are based on monthly prices weighted by monthly marketings during specific periods. These periods, by commodity, are July through June for wheat, oats, and barley; June through May for hay, October through September for corn, January through December for beef cattle, steers and heifers, cows, calves, sheep, lambs, milk, and wool; and December through November for hogs, chickens, and eggs. Prices do not include allowance for CCC loans outstanding, purchases by the government or deficiency payments.

-- Not available.

MONTANA WINTER & SPRING WHEAT PRODUCTION RANKING BY COUNTY**Winter Wheat - 2001**
Production (Bu.)**Spring Wheat - 2001**
Production (Bu.)

MONTANA DURUM WHEAT & BARLEY PRODUCTION RANKING BY COUNTY

Oats - 2001
Production (Bu.)

A map of Montana showing county populations and their ranking among the top ten. The map uses three patterns to represent population ranges: white for 'Less than 30,000', diagonal lines for '30,000 - 69,999', and cross-hatching for '70,000 - 99,999'. Solid black shading indicates counties with a population of 100,000 or more. Numbers 1 through 10 are placed in circles within the counties to show their ranking among the most populous. The counties are labeled with their names: Lincoln, Glacier, Toole, Liberty, Hill, Daniels, Sheridan, Flathead, Pondera, Blaine, Phillips, Valley, Roosevelt, Sanders, Lake, Teton, Chouteau, Petroleum, Garfield, McCone, Richland, Mineral, Missoula, Powell, Lewis and Clark, Cascade, Judith Basin, Fergus, Petroleum, Dawson, Prairie, Wibaux, Granite, Meagher, Wheatland, Golden Valley, Musselshell, Rosebud, Fallon, Ravalli, Deer Lodge, Jefferson, Broadwater, Sweet Grass, Stillwater, Yellowstone, Treasure, Currier, Beaverhead, Madison, Park, Carbon, Big Horn, Powder River, and Carter. Yellowstone National Park is also labeled. A legend at the bottom right explains the population patterns, and a note at the bottom left states 'Numbers show ranking of top ten.'

Numbers show ranking of top ten.

All Cattle & Calves - January 1, 2002
Number of Head

Numbers show ranking of top ten.

1 This report is based on data reported by commercial elevators and licensed truckers. The reported data were expanded to represent 100% coverage of elevator capacity. Crop year is June-May.

2 Spring Wheat includes Durum.

3 Northwest and Southwest were combined to avoid disclosing individual operations.

4 Destination 'Other' includes South and Canada.

This report is made possible through funds provided by the Montana Wheat & Barley Committee.

1 Counties with less than 500 acres planted are combined into "other" counties to avoid disclosure of individual information.

2 Planted acres less winter wheat replanted to spring wheat.

3 Ranking is based on total production per county.

AGRICULTURAL EXPORTS

Montana's Agricultural Exports Decreased \$67 Million in 2001

The value of Montana's agricultural commodities exported during the fiscal year ending September 30, 2001 totaled \$320.9 million, \$67.2 million less than 2000 showing reduced output from severe drought conditions in the State. The value of commodities exported in 2001 decreased for all categories except live animal and meat products. Wheat and wheat products remained Montana's leading export, making up 75 % of the State's agricultural exports. Exports of wheat and wheat products shows the largest change with the value of exports decreasing \$58.2 million from 2000. Feed and fodder decreased \$8.2 million from 2000 as reduced production was needed by the drought stressed producers of the State. Feed grains and products exports were down \$6.5 million from 2000. Seeds decreased \$0.5 million from 2000. The only category to increase was live animals and meat products, up \$5.2 million from 2000.

In fiscal 2001, the U.S. exported \$52.7 billion worth of agricultural commodities, \$2.0 billion more than 2000. Hides and skins accounted for the largest increase in U.S. exports, increasing \$514.3 million from 2000. The value of feeds and fodders exported during 2001 increased \$397.5 million from a year earlier. Wheat and wheat products exports were down 4.8% or \$172.3 from 2000. Live animals and meats dropped 2% from 2000, while feed grains and products were down 1.4%. Nationally, the value of wheat and wheat products exported make up 6.5% of all exports, down from 7.1% in 2000. The export value of live animals and meat accounted for 11.5% of all exports, down from 12.2% a year earlier.

Montana continues its third place ranking among states exporting wheat and wheat products in fiscal year 2001. North Dakota climbed to the top wheat exporter position replacing Kansas as number one. North Dakota is the largest U.S. producer of durum wheat, which typically has a higher per unit value than hard red winter wheat, the predominant class produced in Kansas. North Dakota was followed by Kansas, Montana, Oklahoma, Washington, South Dakota, Minnesota, Idaho, Colorado and Texas. Considering the export of all products, California remained on top, followed by Texas, Iowa, Kansas, Illinois, Nebraska, and Minnesota. Montana remained in the thirty-third position for export of all products.
